

## JK BFH™ II FRONT BUMPERS AVAILABLE SOON!

Poison Spyder BFH™ II front bumpers are designed for those hardcore four-wheelers who value strength, simplicity and function. This bumper was literally “Built For the Hammers” with the best ground clearance, tire clearance and approach angle possible. It is just slightly wider than the Jeep’s frame, with angled facets to improve its ability to slide over the rocks. The BFH™ II bumper is CNC laser-cut from high strength 3/16” plate steel, then precision brake-formed for an exact fit. The BFH™ II bumper features a gusseted DOM tube Brawler Bar or Stinger, high clearance recovery shackles, integrated winch mount, and recessed mounts for OEM Jeep fog lights. Installation requires shortening the vehicle’s frame rails. BFH™ II Front Bumpers come with SpyderShell™ Armor Coat.

BFH™ II is slightly wider than the Jeep’s frame, for maximum clearance

JK BFH™ II is available with Brawler Bar or Trail Stinger (shown here)

Recessed light buckets accept OEM fog lamps or LED cube lights (with adapters)

Installation requires frame modifications to achieve best approach angle
